

KAISER PERMANENTE®

Area Pharmacy Director's Welcome

Thank you for your interest in our PGY1 Residency Training Program.

Choosing the right environment for further learning is an important decision in your professional development. As there are many points to consider, I would like to share a few thoughts about our program.

Kaiser Permanente has an outstanding integrated healthcare system throughout southern California. Prior to serving as the Woodland Hills Area Pharmacy Director, I worked in a variety of positions overseeing many pharmacy service lines. During my years at Kaiser Permanente, it has been rewarding to participate in the continuing evolution of our pharmacy organization.

The Woodland Hills Service Area has nearly a quarter of a million members and has the oldest age demographic in southern California. This provides vast learning opportunities from the varied clinical presentations of our patients. Our medical center consists of a robust hospital with ambulatory care clinics representing most medical and surgical specialties. Our pharmacy ambulatory care program provides services to improve lives, increase longevity and prevent future hospitalizations. We also have inpatient practice, drug use management, home health and outpatient pharmacies. Our pharmacist staff of over 100 have a close, collegial relationship with our physicians, nurses and family medicine residents.

The health and vitality of our patient population is central to our mission. We provide enriched educational learning experiences for students from the pharmacy schools of the University of Southern California and University of the Pacific.

I look forward to meeting you during the upcoming residency recruiting season.

Lisa Rosa, Pharm.D.
Area Pharmacy Director
Woodland Hills Medical Center
Kaiser Permanente of Southern California
