

Jocelyn McDougal, PharmD

Hometown: Rochester Hills, Michigan

Pharmacy school: Mercer University College of Pharmacy

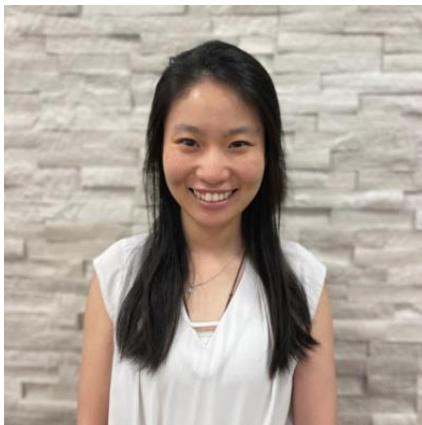

PGY1: Kaiser Permanente Georgia (KPGA)
Managed Care Pharmacy Residency

Clinical interests: Diabetes, HIV, and Population Health

Hobbies: Traveling, discovering the best restaurants around ATL, and all things sports!

Research project: *Assessing the impact of reduced default dispense quantities at the system level for narcotic and non-benzodiazepine sedative hypnotic orders on first fills to improve safety and reduce long term use*

Why I chose Kaiser Permanente Georgia: I was intrigued by the unique integrated health system model which provides an opportunity to deliver value-based care to a diverse patient population. KPGA offers a variety of learning experiences in primary care and specialty outpatient clinics that will equip me to be a more well-rounded clinician. Upon completion of this PGY2 residency, I plan to become a Board Certified Ambulatory Care Pharmacist working to reduce health disparities in underserved communities.

Annie Yeung, PharmD

Hometown: Milton, Wisconsin

Pharmacy school: Concordia University Wisconsin

PGY1: Aurora Health Care Metro, Inc - Milwaukee, Wisconsin
Community-Based Pharmacy Residency

Clinical interests: Primary Care, Geriatrics, GI, and Oncology

Hobbies: Baking, hiking, knitting, and exploring the metro Atlanta region

Research project: *Prescribing practices of the four pillars of heart failure with reduced ejection fraction (HFrEF) therapy in an integrated healthcare system*

Why I chose Kaiser Permanente Georgia: I chose KPGA because of the wide variety of outpatient specialty clinic experiences that they offer to their resident. From my interview day, I could tell that the preceptors were passionate about providing the best care for patients and investing in the development of residents. I know that this program would challenge me and provide me the most growth as I continue my professional career. Upon completion of my residency, I hope to become board certified and practice as a clinical pharmacy specialist in a specialty clinic setting.
