Program Overview

At Kaiser Permanente San Diego, we are excited to continue a thirty-year tradition of excellence in Pharmacy Residency Education. We are proud to deliver an excellent, practical and flexible educational experience relevant to today's clinical pharmacy practice. Our mission is to graduate highly competent, compassionate and skilled pharmacists who will serve and contribute to their communities. Through formal teaching and hands-on experience in a team-based environment, our residents practice in a comprehensive and integrated system, using the nation's largest electronic health record. By working in a diverse environment, our graduates have the flexibility to practice in any setting and are prepared to provide culturally competent care.

The PGY1 Pharmacy Residency Program at the Kaiser Permanente Medical Center in San Diego is accredited by and follows guidelines set by the American Society of Health-System Pharmacists to provide thorough training in a variety of specialties. This residency site agrees that no person at this site will solicit, accept, or use any ranking-related information from any residency applicant.

Two residents will be accepted into the program to begin on July 1, 2024
