

Jasmine Adegbuji, PharmD, MBA

Hometown: Lawrenceville, GA

Pharmacy school: Mercer University College of Pharmacy

Clinical interests: Formulary Management, Utilization Management, Population Health, & Ambulatory Care

Hobbies: Watching Youtube vlogs, cooking, weight training, hiking, & international travel

Research project: *Assessing clinical outcomes of prescribing additional antiretroviral agents to patients unable to achieve an undetectable viral load on first line therapy alone*

Why I chose Kaiser Permanente Georgia: I was drawn to the diverse range of managed care and ambulatory care experiences offered at Kaiser Permanente Georgia. Upon completing the residency, I plan to obtain BCPS. With pursuit to apply acquired skills within a managed care organization, while providing high quality healthcare and improving social determinants of health.

Kelly Gilbert, PharmD

Hometown: Cumming, GA

Pharmacy school: University of Georgia College of Pharmacy

Clinical interests: Ambulatory Care, Primary Care, Diabetes, Infectious Disease, Population Health

Hobbies: traveling, hiking, exploring, going to see live music around Atlanta

Research project: *Evaluation of factors that led to the achievement of A1c goal in patients with type II diabetes*

Why I chose Kaiser Permanente Georgia: I was originally drawn to Kaiser because of the unique PGY1 model that allows residents to gain professional experience in both the ambulatory care and managed care settings. Since being at Kaiser, I have been especially impressed by the culture of inclusion, focus on preventative health, and the extensive use of integrative technology to promote communication between our members and the entire healthcare team. Upon completion of my first year of residency, I plan to pursue a PGY2 in ambulatory care and become a board-certified clinical pharmacist!
